System Requirements

- **Mac**
  - 10.12 Minimum
- **Win**
  - Win 7
  - Win 10
  - Not supported on Windows 10 version 1507, 1511, and 1607
  - Dropped Win 8 support

TypeKit Rename

👍
- **TypeKit now called Adobe Fonts**

- **Can access all fonts now no longer just 100 at a time under More Fonts Tab**

👎
- **Confusing branding as all fonts are NOT Adobe fonts**

Visual Font Browsing

👍 • **Shows under**

  ◦ Control Panel

  ◦ Properties Panel

  ◦ Character Panel

👎 • **DOES NOT SHOW**

  ◦ When creating a Paragraph Style

  ◦ When creating a new Character Style

Visual Font Browsing 2

👍 - **Allows you to Flag a font as a Favorite**

- **Live Rollover preview of selected text (Pref)**
  - **The good**
    - Can see live text preview in context
    - Can see a live preview and a selected set preview at the same time (Prefs)

👎 - **The Bad**
    - Color fonts show as reversed color
    - Can slow down when using "More Fonts" and connected to the internet

OpenType SVG Fonts

- 👍 Most familiar of these are Emojis

- Many SVG Fonts are color fonts

- Have a small SVG flag under Visual Font Browsing

- Using Combo Emojis easier to sort by CID/GID instead of Unicode

- 👎 Changing Emoji color as shown on Adobe's site only works with some Emoji's

Properties Panel

👍 ● **Many of most used features in a single panel**

● **Support the new Visual Font Browsing**

● **Can be used in other modes beside Essential Mode**

● **Context aware**

👎 ● **Can't resize horizontally only vertically**

● **Long panel, lot's or screen real estate**

PDF Form Enhancements

👍 **The Good**

- Gives you more options for interactive PDFs
- Looks good in Acrobat

👎 **The "not so good"**

- Only works with - List Boxes, Combo Boxes and Text Fields
- If saved by another app (Preview), lose newly selected fonts for List and Combo. Text Field is OK.
- Must export as Interactive PDF in order to get these new font features.

Import PDF Comments

👍 • **Can be useful for proofing**

   • **Can be useful for group/team collaboration**

👎 • **Only works with PDFs created in InDesign CC 2019 and Annotated using Acrobat.**

Content Aware Fit

👍 **The Good**

- Quickly gives you a good starting point
- Can be set globally as preference

👎 **The "not so good"**

- Watch out for rotated images
- Watch your EXIF/XMP data closely
- Line Art can be problematic - focus issues

Adjust Layout

👍 • **The Good**

　　• Quickly gives you a good starting point

👎 • **The "not so good"**

　　• Still some work involved, but better than from scratch

　　• Watch your "Zones"

Footnotes for Tables

👍 • **Each table can now have its own footnotes**

• **Each table can also have Endnotes**

Footnotes & Endnotes

👍
- **Can convert a Footnote to an Endnote**
- **Can convert an Endnote to a Footnote**

👎
- Leaves artifacts

Space between paragraphs

👍 • **Separate from Space Before and Space After**

  ◦ **Good for lists**

  ◦ **Quotes**

• **Good for consecutive paragraphs of the same style**

• **Can do a lot with a single paragraph style**

• **Breathing room**

Index Panel Enhancements

👍 ⦿ **Improved Find on Topics Pane makes it easier to jump to an entry**

Next Gen Licensing

👎 • **Appears to have broken a lot of scripts**

• **Extra work for Developers of older scripts**

Other Useful Features

👍 • **Retain file name when exporting a PDF - Yeah!**

  • No more Untitled.pdf

👍 • **Remember previous Export format**

  • On a per doc basis

  • Can save a lot of time if doing revisions

👍 • **Output Printing Instructions during Packaging**

  • Basically an inventory

  • Can also add your own custom instructions
